ASSEMBLY INSTRUCTIONS

The following instructions are to be used for assistance with the set-up and installation of equipment, accessories, and serviceable parts used on this machinery and are not meant to replace any operating or safety procedures as outlined in the Operator's Manual included with the unit.

This safety symbol is used throughout these instructions to alert you to information about unsafe actions or situations, and will be followed by the word DANGER, WARNING, or CAUTION. Be Alert! Your safety and the safety of others is involved.

DANGER - Indicates immediate hazards that may result in severe injury or death. **WARNING** - Indicates unsafe actions or situations that may cause severe injury, death and/or major equipment or property damage. **CAUTION** - Indicates unsafe actions or situations that may cause injury, and/or minor equipment or property damage.

PLASTIC SPOUT INSTALLATION INSTRUCTIONS

Before beginning assembly it is suggested to read through these instructions and lay out all items from the kit to ensure all parts are accounted for. This not only helps you become familiar with the parts and the assembly procedures, but also makes you aware of what tools, equipment or materials you may need to complete the installation process.

Install Spout

1. Position the back band and spout so the spout is covering the discharge opening with the back band on the top side of the auger tube as shown in the illustration below.
2. Place the reinforcement bars under the bottom side of the spout's side flanges and secure reinforcement bars and spout to the back band using the provided hardware (See illustration below).

Parts included in this kit are:

Plastic Spout, Reinforcement Bars, Back Band, Mounting Hardware and Instruction Sheet
